

Your guide to the

MyPATH

VYVGART® Patient Support Program

Here for you
every step of the way

whenever you need us
throughout your journey.

VYVGART®
efgartigimod alfa
400 mg/20 mL

MyPATH, the VYVGART® Patient Support Program, is committed to supporting you throughout your journey.

At the MyPATH Patient Support Program, we understand that living with a chronic condition like generalized Myasthenia Gravis (gMG) is different for everyone.

That's why we're dedicated to supporting you at **every step** – in the way that suits you best!

The steps in your support journey:

GETTING TO KNOW YOUR NURSE CASE MANAGER

Now that you've had your initial welcome call with your Nurse Case Manager, read more about how they can support you on the next page!

UNDERSTANDING YOUR VYVGART® TREATMENT

Your Nurse Case Manager will provide information about your disease, your treatment with VYVGART®, and the importance of symptom tracking.

NAVIGATING INSURANCE COVERAGE

Your Nurse Case Manager will help you explore and navigate the insurance coverage available to you.

COORDINATING YOUR VYVGART® TREATMENT

The MyPATH Patient Support Program will coordinate scheduling your infusion, either at home or in clinic, and ensure VYVGART® is delivered.

ONGOING COMMUNICATION

Your Nurse Case Manager will help you continue to track your symptoms, and provide ongoing support that can help you benefit from your VYVGART® treatment.

Your MyPATH Patient Support Program Nurse Case Manager

When you enroll in the MyPATH Patient Support Program, you'll be paired with a dedicated, experienced Nurse Case Manager who will provide personalized support based on your needs.

WELCOME CALL

You should already have had a welcome call with your Nurse Case Manager to introduce you to the program.

Your Nurse Case Manager is your personal point of contact with the MyPATH Patient Support Program.

As you read through this brochure, look out for this icon for ways your Nurse Case Manager can help!

UNDERSTANDING YOUR VYVGART® TREATMENT

Receiving a diagnosis and starting a new treatment can be stressful. You have a lot of information to process. We're here to help alleviate any concerns, lighten your load, and answer questions you may have.

Your Nurse Case Manager will:

- Provide information about gMG.
- Explain what VYVGART® is and how it works.
- Prepare you for the treatment process: what happens before, during, and after your infusions.
- Show you how to track your symptoms easily with a symptom tracker (see below).
- Answer other questions you may have about VYVGART®.

Tracking your symptoms with the MG-ADL tool

You know your symptoms best. Your Nurse Case Manager will demonstrate the value of regular symptom tracking using the MG-ADL (Myasthenia Gravis Activities of Daily Living) assessment tool.

Regular symptom tracking will be helpful for your neurologist and the rest of your care team. Your MG-ADL scores will help determine the optimal length of time between VYVGART® treatments.

NAVIGATING INSURANCE COVERAGE

We understand that dealing with insurance plans can be complicated and frustrating. We will support you in navigating insurance coverage and financial assistance, so that you can focus on your treatment and overall health.

Your Nurse Case Manager will:

- Work directly with your healthcare team, provincial government drug plans, and insurance companies to explore the coverage options for you.
- Support you in securing coverage.
- Provide you with regular updates on the status of your coverage.

COORDINATING YOUR VYVGART® TREATMENT

Facing gMG can be overwhelming. The MyPATH Patient Support Program is here to help! Your Nurse Case Manager will coordinate all aspects of your treatment.

You can choose to have your VYVGART® treatment administered either at your home or at a clinic. VYVGART® will be delivered to your preferred location.

Your Nurse Case Manager will:

- Discuss your options with you.
- Notify the scheduling team of your preferred treatment location.
- Send your prescription and coverage info to a specialty pharmacy.
- Ensure your VYVGART® is delivered in time for your infusion.

ONGOING COMMUNICATION

Consistent support from your Nurse Case Manager can help ensure that you benefit from your VYVGART® treatment.

Together, you will **find your path**, helping you live your life the way you choose.

Your Nurse Case Manager will:

- Follow up regularly, to help you get the most out of your VYVGART® treatment.
- Support you in continuing to track your symptoms.
- Equip you with other tools and resources you can use to take an active role in your treatment.
- Support you in following up with your physician regarding your VYVGART® treatment plan.

The treatment journey will be different for every VYVGART® patient.

Our support is tailored to your needs.

Whenever you have questions or concerns, contact the MyPATH Patient Support Program. We're here for you.
